- Advance java

Additional Information

TECHNICAL SKILLS

Programming Languages: C++, Core Java, advance java, struts

Database: SQL

ACADEMIC PROJECT

Name: Analysis of Data DE duplication on Cloud using the Privacy-Preserving Encrypted Files

Technology: Jsp, Servlet, Mysql.

Description:

This application is used to secure file storage on cloud by encrypting and then storing files parts into multiple chunks.

Also Application is able to detect duplicate files by generating hashed values using MD5 message digest for entire file content.

We have used AES algorithm to encrypt files before storing them onto cloud.

User can download original files only after successful OTP authentication.

STRENGTHS

Willing to learn new things and quick learner.

Honest, responsible and hard working.
